

History

PAL Institute of Health Safety and Environmental Services Limited is the largest Health and Safety training Institution in the Caribbean. Incorporated in 2005, PAL is located in the Twin Island Republic of Trinidad and Tobago in the West Indies and operates as a limited company with over 60 years of combined experience in the fields of Occupational Health, Hygiene, Safety, Environment, Quality Assurance, Risk Management and Fire Safety.

We understand that there is a need for specialist services to assist Caribbean organisations in meeting these goals within the twenty first century, and on this basis, PAL has been developed.

Our services are offered with your specific requirements in mind.

Regardless of whether your business is based in commerce or industry, public or private sector, retailing or manufacturing, we can help you survey your whole organization and advise on training programmes, and/or specific procedures & practices and control measures.

Much of the work we do is undertaken as part of long term advisory contracts; however we are also pleased to work with small businesses in any sphere, and welcome one-off assignments. We also provide training to the public for individuals who may have a desire for knowledge in these fields.

We are proud of our established client list, which includes many well-known multi-national names in industry and commerce, both nationally and regionally.
